

Design a Futuristic Cityscape

Design a city like no other – one that exists beyond the limits of today. It could be underground, on or in the sea, or even on another planet. Who lives there? How do they get around? Give your city a name. Every amazing city deserves an amazing name: _____

Need some inspiration? Here's some things to think about:

- Buildings: What shapes are they? Spirals, bubbles, crystals?
- Nature: How does nature live with the city? Are there floating gardens or robot bees?
- Power: Does your city use wind, solar, or something wild like lava energy?
